This journal is printed by Cambridge University Press. CUP is the oldest printing and publishing house in the world. It was founded in 1534, as part of the university, and produced its first publication in 1584, beating Oxford University Press by one year. Its mission was to acquire, conserve and disseminate knowledge concerning all subjects.

A brief account of the early years of printing, from its invention in the 1450s in Germany, along with a narrative detailing the ethos and practicalities behind the setting up of CUP, and its subsequent evolution, can be found in Michael Black's *A Short History of Cambridge University Press* (1993, Cambridge University Press: 117pp.).
