# FIRST CIRCULAR

*The Organising Committee of the 20th International Nannoplankton Association Meeting is pleased to invite you to participate in this event, that will be held on February 14-19, 2027, in La Plata, Buenos Aires Province, Argentina.*

## 20th International Nannoplankton Association Meeting

La Plata • Argentina

*The INA meetings gather the nannoplankton experts from around the world in a selected place to discuss the progress of our science, share experiences and ideas, build up working bounds, and reunite with colleagues and friends.*

*The 2027 edition of the INA meeting has a special significance, because we will be celebrating the 50th anniversary of the International Nannoplankton Association! Since first edition in 1985 in Vienna, Austria, many discoveries and improvements have been made and the nannoplankton community has grew up tremendously.*

*We are proud to be the next hub of Nanno-science and to host the international community in La Plata for this special edition of the meeting. We warmly invite researchers, students and professionals working on nannoplankton and related fields to join us in Argentina to share their latest research, exchange ideas and celebrate together 50 years of the International Nannoplankton Association.*

*We very much look forward to welcoming you to La Plata in 2027!*

## Venue

*Founded on 19 November 1882, La Plata is the capital of the province of Buenos Aires, situated 56 km from the Autonomous City of Buenos Aires. Architecture, gastronomy, museums, shopping, outdoor activities, culture and events – La Plata has it all.*

*It is also known as the 'City of Diagonals', the 'City of Linden Trees' and the 'City of Students' due to its large number of public and private universities and further education colleges. Furthermore, as the provincial capital, it is home to professional bodies and, of course, government agencies.*

*La Plata is a global benchmark for its urban planning, where the "Perfect Square" features 23 parks and squares, boasts a wide variety of tree species that adorn the streets, and as you move away from the centre, you can hear the song of starlings, woodpeckers, ovenbirds, parakeets and thrushes.*

*The city is also known for being innovative in many aspects: it was the first city to have traffic lights and public electric lighting; by 1887, telegraph and telephone services had already been launched, and by 1892 the first electric tram route was operational, making it the first city in South America to have this form of public transport.*

*INA 20 will be held at the **Centro de Posgrado Sergio Karakachoff** of the **Universidad Nacional de La Plata**. The building is a perfect place as it has a good infrastructure of rooms and auditoriums for the meeting activities, it is accessible, has a dedicated space for art exhibitions, and it also counts with a bar/restaurant for quick snacks and drinks. It is located in the very city centre, near to several cultural and historical sites, and accommodation places.*

## ***Are you willing to attend the INA 20?***

*In order to better organize and tailor the meeting to the needs of our scientific community, we ask that you complete the following brief survey no later than June 27th, so that we can begin meeting preparations.*

**[Access to survey](#)**

## MORE INFO AND OFFICIAL CONTACT

*We will be providing more information about abstract submission, accommodation, fieldtrips, workshops, and other activities in our website and the upcoming circulars.*
